

The logo for NTCC (Netherlands-Thai Chamber of Commerce) features the letters 'NT' and 'CC' in blue, with a stylized orange leaf-like symbol in the center. The background of the top half of the image is a photograph of a greenhouse with rows of plants in white bags, and a person in a blue jacket walking through the aisles.

New Farmsn like in EU

Kipster: a new chapter in sustainable chicken farming
One step beyond organic or free-range: Kipster chickens lay carbon-neutral eggs.

Green Camel: growing over 130,000 kg of fresh leafy greens in just 0.4 ha. Growing vegetables and fish in a symbiotic way, without the waste or environmental risk experienced by conventional growers.

Floating Farm: bringing the farm back to the city as part of a clean, livable and conscious city transformation. Produce healthy food close to consumers in a transparent and educational way.

Scelta has been driving innovation in the mushroom industry for more than 25 years and is continually looking for new taste sensations, new opportunities and healthy products.

Lely Orbiter: future-proof dairying. This on-farm dairy processor makes processing milk on the farm affordable, practical, safe and, above all, profitable.

Mosa Meat: pioneering a cleaner, kinder way of making beef. A food technology company that's helping everyone take a bite out of a better future – starting with the world's kindest beef burger

KOPPERT
BIOLOGICAL SYSTEMS

Koppert Biological Systems makes agriculture and horticulture healthier, safer, more productive and resilient by using natural enemies and micro-organisms to combat pests and plant diseases.

CREATING
A CLIMATE
FOR GROWTH

PRIVA

With over 60 years of experience in horticulture, we use our technology and expertise in plant biology to ensure sustainable production of safe and nutritious food.

We provide integrated solutions for growing plants in an indoor facility, allowing a predictable high-quality yield, year-round.
