

## **Contingency plan test at Saha Rattana Nakorn Industrial Estate on 26 September**

Industry Minister is confident of flood prevention measures in Ayutthaya and Pathumni as all barriers were in place.

According to M.R. Pongsawat Sawasdiwat, Industry Minister, construction of dikes in five industrial estates in Ayutthaya and Pathum Thani provinces has made good progress. Saha Rattana Nakorn's temporary dike construction, however, needs close monitoring to ensure it is completed by 15 August 2012 as planned.

On 26 September 2012, the management of Saha Rattana Nakorn Industrial Estate and concerned government and private organizations will jointly test the contingency plan at the industrial estate as part of the preparedness program and further improvement.
