# **What about basic resources and infrastructure in Thailand?**

To support your ICT needs

# Basic resources and infra (基本的なインフラ)

## 01. Power 電力 - Need to prepare

- UPS/発電機等の初期投資、保守計画をしっかりとしておくとお後々の問題を減らします。
- 可能ならばDC、クラウドの利用検討を

Generation (発電): EGAT / IPP / SPP

Transmission (送電): EGAT

Distribution (配電): MEA for Bangkok Metro Area / PEA for other part of Thailand

*Note: IPP may have capacity to sell in some I.E depends availability.*

Quality: Expect for occasional short hit.  
Most of power outage last less than 10 min.  
Outage prolong more than 1 hour is rare.

Counter measure:  
Most of commercial building has power generator (shared by tenants)  
Some business prefer to set up dedicated generator set to cover their utility load.

From our experience: some IE has more stable power grid compare to Bangkok metro.

## 02. Logistic 物流

---

### Road and traffic

- Bangkok metro, Need to expect traffic delay during peak hours.
  - To ease traffic jams, Multiple mass transit is in expected in next decade.
- Outside Bangkok, Nation-wide highway system is well established. Very good road system already in place. Government will be keep investing road system expansion to support Thai and Mekong economy development.

### Custom Clearing and Processing

- If it is normal IT hardware, Not see much of delay.
- Heavy machinery (UPS/Generator) may require more processing time

## 03. Workforce in Thailand、人材と雇用

- お金を出せば人材は居ます
- 英語を話すエンジニアを日本やシンガポールで雇用するよりも安価
- IT業界のTurn over rate 約20%
- 魅力のある仕事、働く環境の提供
