

Investment in CLMV+I

Tax & Regulatory Updates
Cambodia – Lao PDR – Myanmar Vietnam
– Indonesia

EY Office (Lake Rajada Office Complex)
25 October 2018

With a local market saturation and intense competition amongst domestic players, a business expansion to overseas is increasingly gaining attention from investors. Due to the growth potential, reasonable labor costs and strategic locations, Cambodia, Lao PDR, Myanmar, Vietnam (CLMV countries) and Indonesia are those providing great opportunities for Thai investors and Thailand can be positioned as a regional center for these neighboring countries.

The effective tax risk management, regulatory environment, investment climate, and incentives have posted crucial challenges to many corporations investing in foreign countries. Changes in foreign tax laws and international tax environment will inevitably affect existing and future cross-border transactions. To be a successful investor, you need to stay abreast of these issues, as ongoing economic reforms come with constantly changing regulations.
